Note from Internshala's CEO

> **May your reality surpass your dreams!**

Feeling underconfident about your job search, especially if it is your first job? Not getting interview calls? Not sure if you have the skills and the attitude that companies look for or feel nervous when facing an interview? Or is the fear of AI's impact on the jobs making you lose sleep? Or maybe you are stuck in a job that you hate and want to switch to a new field.

At Internshala, we understand this challenge intimately. With over a decade of experience in the hiring ecosystem, we've built **placement-focused courses** designed to truly prepare candidates for today's job market. Backed by a curriculum that is designed to meet every changing industry demand and technological landscape, these courses emphasize hands-on learning through **real-world projects** and come with **government-recognized certifications.**

But we don't stop at skill-building. Every learner gets access to **personalized mentorship**, support in crafting compelling resumes and portfolios, and an **exclusive job application channel** with **250+ hiring partners**. Thousands of our students have already received job offers, and the number grows every month.

At Internshala, our mission has always been **to help every student get the best start to their careers.** And with every success story, we move a step closer to that goal.

-Sarvesh Agarwal

Why Internshala Trainings?

Internshala Trainings Benefits

Top industry experts from top brands

Top roles you can land after course completion

- UX Designer
- Product Designer
- Visual Designer
- Interaction Designer

75% students get hired within 3 months of course graduation

Learner Success Stories

From confused to confident: See where our learners are now

Aritra Banerjee
Associate Product Manager

The UI/UX course was a great learning experience. I learned key concepts like Auto Layout, Variants, and UI design principles from scratch. The live classes helped clear my doubts, making learning smooth. Thanks to this course, I landed a full-time job as an Associate UI Designer. Overall, I highly recommend the course.

Ritesh Gollagudam
Associate Graphic Designer

I got my first job from Internshala, so I had trust in the platform. I checked the reviews, went through the course brochure, spoke to a counsellor, and then enrolled myself in the UI/UX course. The problem statements of the projects were very unique, they cover all the skills. The instructor was very good at the subject and cleared my doubts quickly.

Deepak Udaypurey
UI/UX Designer

I am a civil engineering graduate, and I wanted to pursue a career in UI/UX. It was a risky bet to switch my career, so I progressed with the course at Internshala because I trusted the platform. There was a good balance of live classes and recorded classes, where all my queries were resolved easily. I got hands-on experience working on projects like creating UI for a delivery and an event management app, which helped me get placed.

Pooja Habib
UI/UX Designer

My learning experience was great. The projects and assignments helped me understand how real-time work would be, especially the mock tests and mock interviews – they really helped me during the actual interview process. The course modules are helping me out in my current role, also.

Learner Success Stories

From confused to confident: See where our learners are now

Samidha
UI/UX Designer

The course structure helped me - it involved a lot of hands-on learning, designing case studies, etc. The team played a great role in organising 1:1 sessions & helping me build a portfolio and case studies to apply for internships and jobs. The best part was being able to do it at my own pace.

Anshuman
UI/UX Designer

The course was informative and our instructor were very supportive. The doubt-clearing sessions were also very useful. I was able to use the knowledge & the projects from the course to get a job easily. I highly recommend this course
